

**Improve efficiency.  
Increase profitability.  
Eliminate labor with the...**

[mulchmule.com](http://mulchmule.com)

### **Scale your business overnight.**

The Mulch Mule gets what you need where you need it with speed and efficiency. With the man hours you save, you can re-purpose that manpower where you need it. If you have a smaller crew, the efficiency will allow you to take on projects that would have typically been out of your reach and realize new profits.

This is an investment that can pay for itself, take a load off of your employees, and increase profit right away.

### **Reduce your labor costs by 30%.**

Moving and distributing materials is a labor-intensive task. The Mulch Mule is designed from the ground up considering the materials typically used in maintenance and construction, and then engineered into a single piece of equipment to efficiently automate the back-breaking tasks.

### **One machine does the job of many.**

With innovative features like our Live Floor System, Curb-side Discharge and powerful Honda® GXi390 Engine, this versatile piece of equipment can do it all... and better.

*Leaf Vacuum* - the powerful vacuum, auto tarping system, and fast discharge add unparalleled efficiency.

*Mulching* - wheelbarrow loads in 3 to 6 seconds unassisted provides speed and finesse, beating out dusty, plant-damaging mulch blowers.

*Trailer* - the forward and reverse live floor action provides easy loading and unloading of any skidded materials. It also handles nearly any bulk material with rapid discharge and unbelievable precision.

### **Handle materials with ease.**

Soil. Mulch. Leaves. Debris. Stone. Aggregate.

We think you get the point. With two ways to load and unload, you will be able to handle 15 Cubic Yards of bulk materials with ease and efficiency. When you really put the live floor to work, you'll find that you can haul just about anything you can get into the machine, and get it out in as quick as 45 seconds.

"It's all about time and manpower, so if you want to compete in this business, **you need to have a Mulch Mule.** The Mule gives us the ability to get more work done in less time and with fewer men. We will continue to add Mules because they help us to grow our business. **You can't compete with me unless you have a Mulch Mule... and I have four!"**

-Gary Clark, Owner/VP Environmental Management Inc.

## Specifications

- 13HP Honda® GXi390 engine with remote start, function activated throttle and 18-amp charging
- 15 cubic yard capacity aluminum hopper
- Direct drive variable speed belt over chain rolling quick-discharge live floor system
- High output curb side discharge conveyor
- Direct driven material conditioning tine bars
- High efficiency hydraulic drive system
- Heavy duty tailgate with tube construction and quick dump rear discharge
- 215/75R 17.5 tires- 14 ply-rated 4805 lbs. each on steel modular wheels
- 8,000 lb. each tandem torsion axles with 12.25"x3.375" electric brakes and breakaway
- Conspicuity tape and bi-lingual safety stickers
- Heavy duty ¼" wall rectangular steel tube frame with LED lighting
- Conspicuity tape, rear mount bumper
- Electric Bigfoot® jack
- Automatic Aero® tarp system with Monster Mesh® tarp
- 2' x 14' marketing panels
- Work lights
- 2 rakes
- 2 shovels
- 4 safety cones
- 2 wheel chocks
- Solar power battery tender

## Optional Equipment

- Extension conveyor, mounts on curb side discharge chute
- Leaf Vacuum Attachment (Not installed, shown in photo): 37HP Billy Goat®, mounts to front A-frame on hitch
- Factory installed customer graphics

## Dimensions

*Empty, without additional*

- Approximate weight: 5610 lbs.
- Tongue weight: 680 lbs.
- Loading height: 92" (7' 8")
- Overall height: 100" (8'4")
- Overall width: 96" (8')
- Overall length: 292" (24' 4")
